17  |  ??? tip "about your images..delete the tip!!"  
18  |  
19  |   1. Remember to credit/reference all your images to their authors. Open source helps us create change  
faster together, but we all deserve recognition for what we make, design, think, develop.  
20  |  
21  |   2. remember to resize and optimize all your images. You will run out of space and the more data, the  
more servers, the more cooling systems and energy wasted :) make a choice at every image :)  
22  |  
23  |   This image is optimised in size with resolution 72 and passed through tinypng for final optimisation.
