

NEW jacket from OLD jeans

For this model you will need the following materials:

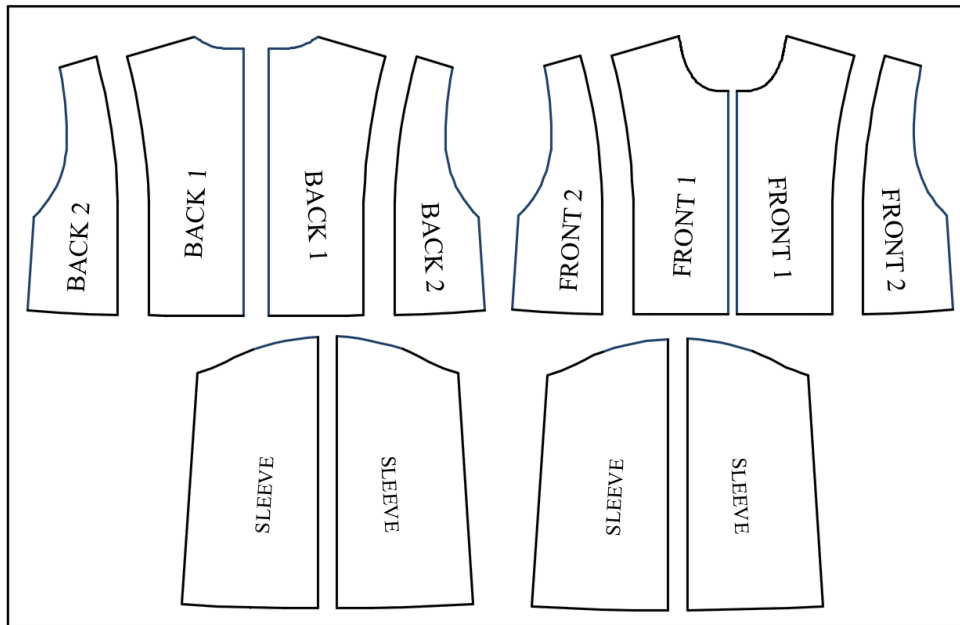

- 3 pairs of regular jeans for men (size 34);
- ruler;
- tailor's chalk;
- scissors;
- needles;
- thread for sewing machine;
- 3 snaps with a diameter of 0.8 cm;
- 2 snaps with a diameter of 0.5 cm.

NEW jacket from OLD jeans

STEP 1. Pattern & basic details

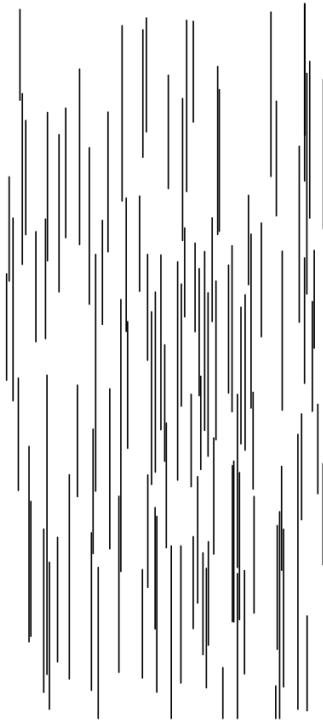

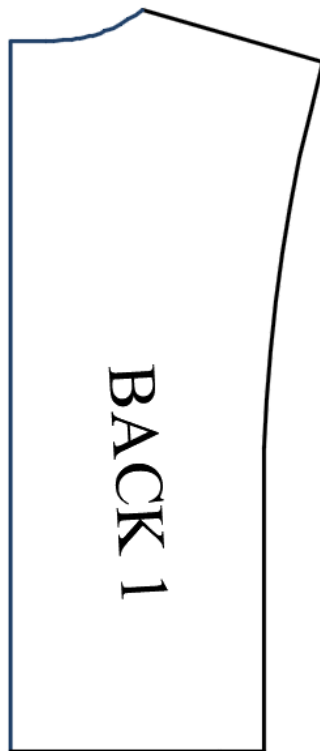

- First, you will need the pattern! The pattern for the size XS-S can be downloaded from the link in the description of this post.
- Prepare jeans for tailoring.
- With chalk for tailoring, draw the outline of the details on the pieces of denim. You need to sew: FRONT 1 - 2 pieces; FRONT 2 - 2 pieces; BACK 1 - 2 pieces; BACK 2 - 2 pieces; SLEEVE - 4 pieces.

STEP 2. Laser engraving

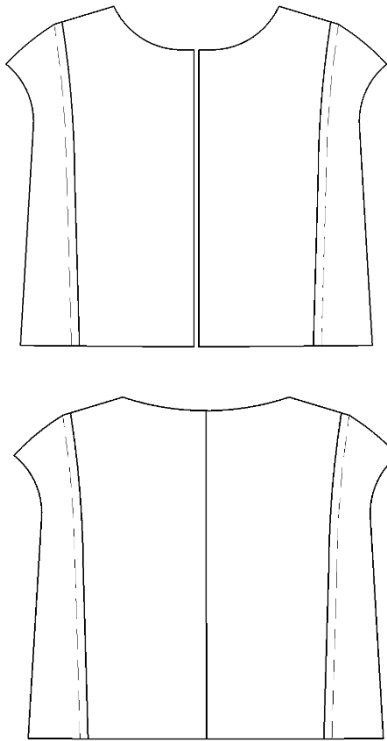

- On the back piece I made a decoration by applying the technique of laser engraving. If you also want to make this decoration, you can see in the picture the scheme of this drawing.

STEP 3. Assembling the details of the front and back

- Overlay face-to-face details;
- Assembling the details and process the edges;
- Iron the accomplished seam;
- Apply a decorative seam, at a distance of 1-2 mm from the edge of the seam.

NEW jacket from OLD jeans

STEP 4. Decor the jacket with scrapes of jeans.

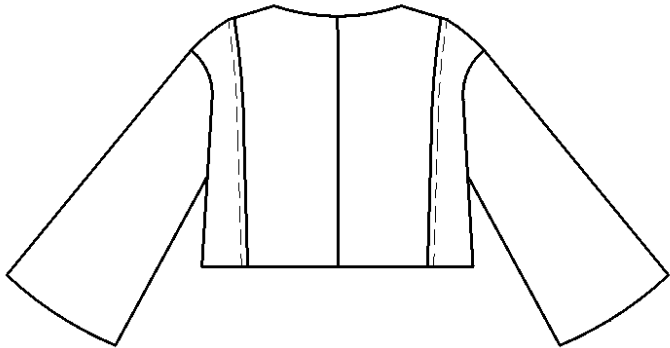

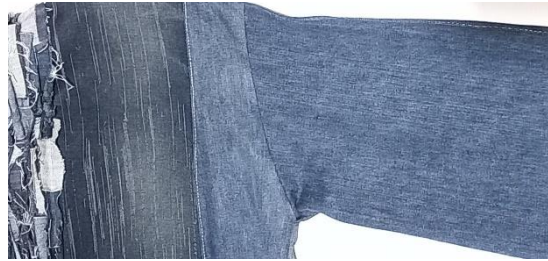

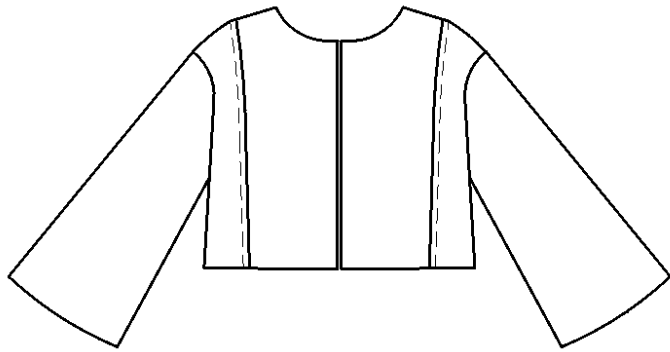

- Cut the remaining jeans scraps into strips of 2 cm wide. The length of the strips can be different;
- Apply these strips on the basic pieces, abstractly, for creating the decor;
- Strips can also be placed with the reverse side up;
- Sew these strips step by step to get the desired decor.

NEW jacket from OLD jeans

STEP 5. Assembly of jacket parts.

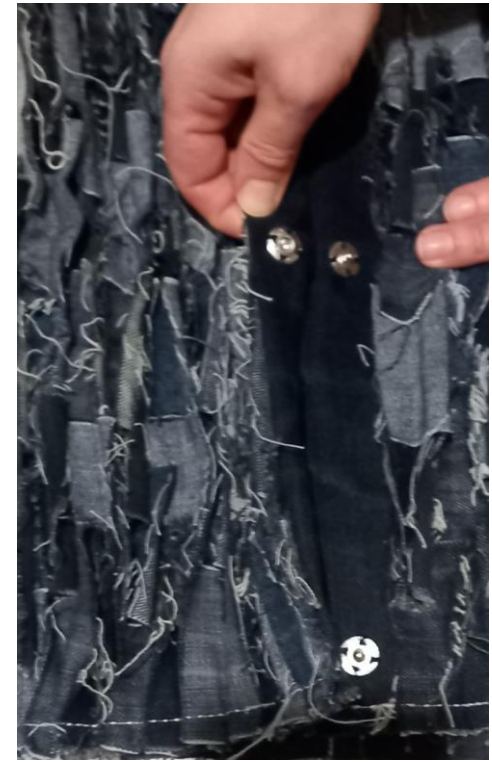

- Applying sleeves to the jacket
- Assembling the jacket on the upper lines (shoulder lines and upper sleeves lines)
- Assembling the jacket on the side lines and lower lines of the sleeve
